# Dynamic Programming

approach

buy → sell

Profit →  $6 - 1 = 5$

$\rightarrow \text{mini} = arr[0]$   
 $\rightarrow \text{profit} = 0$

$\text{sell} \rightarrow i^{\text{th}}$   
 $\text{buy} \rightarrow 1 \rightarrow (i-1)^{\text{th}} \text{ day}$

for (int i = 1; i < n; i++)

{ int diff = arr[i] - mini;

profit = max(profit, diff);

mini = min(mini, arr[i];  
 }

short profit:
